EXPERIENCE

Conducting Research

April, 2026

- Working on a research paper on cancer detection using thermograms and deep learning
- Focuses on improving accuracy and reducing parameters by up to 7x, using TensorFlow, UNet, Python, NumPy, CUDA, Matplotlib.

TechNex HackitOut Hackathon

March, 2026

- Led a team of 4 in a 24-hour hackathon to build PyClima
- Built the entire frontend including file upload UX, real-time dashboards with heatmap, graph and 3D globe rendering.
- Integrated Frontend with Backend, deployed on Vercel: [PyClima](#)

Smart India Hackathon

August, 2026

- Selected for India's largest hackathon; contributed to frontend of an AI-based platform for farmers
- Contributed to building an image-processing pipeline to classify crop conditions and suggest actionable insights.

PROJECTS

My Portfolio

React • JavaScript • HTML • CSS • Framer Motion

- Fully original portfolio with custom animations and responsive design using React, suitable across all screen sizes.
- 97/100 Lighthouse performance score; deployed on Vercel: [Portfolio](#).

PyClima

JavaScript • HTML • CSS • Plotly

- Built entire frontend from scratch for a climate data visualization platform
- File upload UX supporting datasets up to 5GB with heatmap, graph and 3D globe rendering; deployed on Vercel: [PyClima](#)

E-Commerce Website

React • Redux • Context API • Hooks • Router • HTML • CSS • Bootstrap

- Followed a structured project to deeply understand React state management
- Implemented Redux, Context API, Hooks and React Router for navigation; deployed on Vercel: [E-Commerce](#)

GitHub Profile Finder

JavaScript • HTML • CSS • REST API

- Fetches and displays live GitHub profiles via REST API
- Includes error handling, loading states and responsive design; no frameworks used; deployed on Vercel: [GitHub-Profile Finder](#)
